

HDP GIS Data DVD

Version 5 - Notes

Modifications to the “GIS Standards and Procedures Manual”:

1. Updated the GIS data inventory to reflect new/updated datasets

Data Changes:

1. Inclusion of updated datasets from the MOA Watershed Management Section
 - a. WMS Data is now organized into 2 personal geodatabases located in the “\HDP_GIS\version5\Data\From_MOA_IT” folder.
 - b. The first geodatabase is named “WMSHydrography_070525.mdb”. The feature classes are:
 - i. E04MLegacyStreams_070525
 - ii. E04MLakes_070525
 - iii. E04MMarine_070525
 - iv. E07MStreams_070525
 - v. E07MMWetInds_070525
 - vi. E07MWSheds_070525
 - c. The second geodatabase is named “WMSDrainagewaysAndNodes_070525.mdb”. The feature classes are:
 - i. e07MOADrngwys_070525
 - ii. e07MOADwyNodes_070525
 - iii. e07MSubDBsns_070525

This geodatabase also contains relationship classes that are described in the WMS data dictionary (see item ‘d’ below’).
 - d. Metadata documents from WMS are located in the “\HDP_GIS\version5\Data\From_MOA_IT\WMS_Metadata_PDFs” folder
 - e. Layer files and data sources in the included MXD files have been updated to reflect the updated datasets. **Be sure to update data source references in any MXD files you’ve created to ensure your maps display the most recent data!**
